DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1, 3, 8, 10, 15, 17 are rejected under 35 U.S.C. 102(e) as being anticipated by Bischoff (US 2003/0216158 A1).

Prior art discloses:

Claims 1, 15:

A system comprising:

A tailing sensor (¶ 25; ref 178d) coupled to a first microcontroller module / means & control system (¶ 25, ln 2-3; ¶ 26, ln 1-3);

The sensor is disposed adjacent a laterally extending tailing auger between adjacent sidewalls of the combine (fig 1);

Claims 3, 17:

Art Unit: 3671

As taught in ¶ 25, ln 2-3; ¶ 26, ln 1-4 multiple microcontroller modules (second) means used, i.e. microcontrollers;

As applied to claim(s) 8 & 10, in view of the structure disclosed/taught by Bischoff, the method of operating/using the device is inherent since it is the normal and logical manner in which the device is used.

Allowable Subject Matter

3. Claims 4-7, 11-14, 18-21 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Response to Arguments

4. Applicant's arguments with respect to claims 1, 3-8, 10-15, 17-21 have been considered but are moot in view of the new ground(s) of rejection.

The FINAL is issued due to a change in claim language at least in one of the claims, such as in claim 1. Canceled claim 2 although appears to have been incorporated into claim 1, however the original claim recited: "the sensor is ... **to be** disposed," versa the current claim is "the sensor is disposed...." Thus, the Examiner in view of the more limiting claim was required to do additional search and examination in order to meet the claim language.

Conclusion

5. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Behnke, Haack et al.
